A 6 x 4 inch print, at true scale

Print at 100% / Actual Size. Disable Fit and borderless enlargement. Measure before judging size.

6 in = 152.4 mm

4 in = 101.6 mm

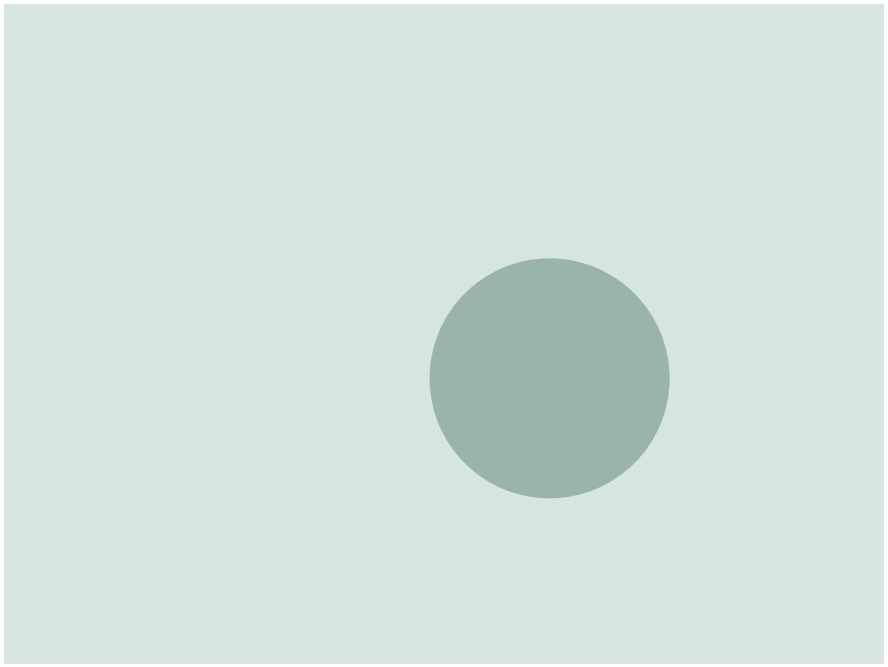

INCH RULER - verify the 0-to-1 interval is exactly one inch.

This file establishes dimensions only. Paper finish, printer color and borderless crop require a real print.

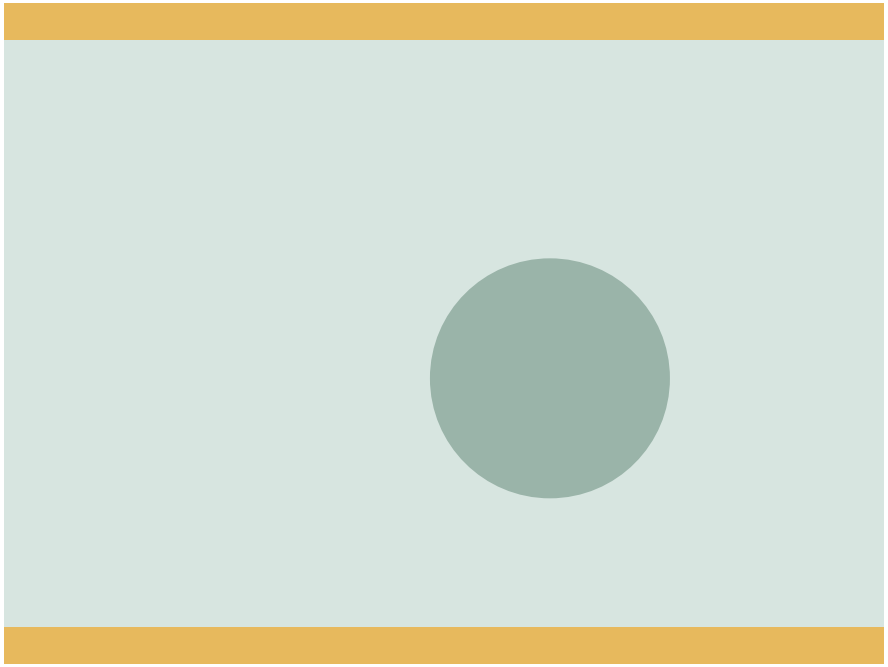

Cropping: 4:3 source to 3:2 print

Original geometric diagram / no camera, lens, scene or measured image quality is implied

4:3 source

3:2 print crop

4000 x 3000 px -> ideal 4000 x 2666.67 px crop

Keep 88.89% of the original area; remove 11.11% (5.56% from top and bottom when centered).

Pixel grids require rounding: choose a practical 3999 x 2666 crop for an exact 3:2 ratio.

A border-preserving Fit export keeps the full image; a Fill export crops. Preview each lab order.

Portrait: rotate 6 x 4 to 4 x 6. Square crop from 4:3 keeps 75% of the original area.
